

In the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A fuel supply device comprising:
a data interface configured to receive data from a mobile electronic device;
a fuel reservoir configured to store fuel comprising hydrogen;
a fuel interface configured to connect with the mobile electronic device; and
a transfer mechanism configured to transfer fuel comprising hydrogen from the reservoir to the fuel interface and into a fuel storage portion of the connected mobile electronic device in dependence upon the data received from the mobile electronic device.
2. (Previously Presented) The fuel supply device according to claim 1, wherein the fuel supply device is configured to automatically transfer fuel comprising hydrogen to the mobile electronic device when the fuel interface connects with a corresponding fuel interface of the mobile electronic device.
3. (Previously Presented) The fuel supply device as claimed in claim 1, wherein the fuel reservoir is user-refillable.
4. (Previously Presented) The fuel supply device as claimed in claim 1, wherein the fuel reservoir is a user replaceable container.
5. (Previously Presented) The fuel supply device as claimed in claim 1, wherein the fuel comprising hydrogen is a liquid.
6. (Previously Presented) The fuel supply device as claimed in claim 1, wherein the data interface is comprised in the fuel interface.
7. (Previously Presented) The fuel supply device as claimed in claim 1, arranged for use with multiple different mobile electronic devices, wherein the data interface is configured to

transfer an identifier between a mobile electronic device to which fuel is supplied and the fuel supply device.

8. (Previously Presented) The fuel supply device as claimed in claim 7, wherein the identifier is configured to identify the mobile electronic device to which fuel is supplied.

9. (Previously Presented) The fuel supply device as claimed in claim 7, wherein the identifier is configured to identify the type of fuel for supply to the mobile electronic device.

10. (Previously Presented) The fuel supply device as claimed in claim 7, further comprising a meter configured to control the amount of fuel dispensed.

11. (Previously Presented) The fuel supply device as claimed in claim 1, embodied in a supporting stand for the mobile electronic device, wherein the supporting stand comprises a cradle for receiving the mobile electronic device.

12. (Previously Presented) The fuel supply device as claimed in claim 11 further comprising a detector configured to detect when the cradle receives a mobile electronic device; and a controller, responsive to the detector, configured to enable transfer of fuel from the fuel reservoir to the mobile electronic device.

13.-21. (Canceled)

22. (Previously Presented) The fuel supply device as claimed in claim 1, wherein the data interface is a wireless interface.

23. (Previously Presented) The fuel supply device, as claimed in claim 8, wherein the identifier is configured to authenticate the mobile electronic device.

24. (Previously Presented) The fuel supply device as claimed in claim 8, wherein the identifier is configured to charge for transferred fuel to an account.

25. (Previously Presented) The fuel supply device as claimed in claim 24, wherein the account is a cellular phone bill account.

26. (New) A fuel supply device comprising:

a data interface configured to receive data from a mobile electronic device;
a fuel reservoir configured to store fuel comprising hydrogen;
a fuel interface configured to connect with the mobile electronic device;
a transfer mechanism configured to transfer fuel comprising hydrogen from the reservoir to the fuel interface and into a fuel storage portion of the connected mobile electronic device in dependence upon the data received from the mobile electronic device; and
an input/output interface configured to transmit the data to an authenticator, and to receive an authorization to dispense the fuel into the fuel storage portion of the connected mobile electronic device.

27. (New) The fuel supply device as claimed in claim 26, further comprising a meter configured to control the amount of fuel dispensed.

28. (New) The fuel supply device as claimed in claim 26, wherein the data is configured to charge for transferred fuel to an account.

29. (New) The fuel supply device as claimed in claim 28, wherein the account is a phone bill account.
